Welcome to *Bridge to Success Grade 12*

Bridge to Success is a twelve-grade course for learners of English as a Second Language (ESL). The twelve grades range from the beginning of Cycle 1 to the end of Cycle 3. The course has been designed to fulfil the requirements of the English as an International Language (EIL) National Learning Standards Unified Framework.

Bridge to Success Grade 12 consists of twelve thematic units of study, which include a range of activities, text types and objectives, split over three terms.

The materials reflect the following principles:

- **An Emirati focus, with an international perspective.** Specifically developed for young learners throughout the United Arab Emirates, the themes, situations and literature covered by *Bridge to Success* strive to reflect the Emirati context and encourage learners' curiosity about the wider world. This fosters respect and interest in other cultures and leads to awareness of global citizenship.
 - **An enquiry-based, language-rich approach to learning.** *Bridge to Success* engages children as active, creative learners. As learners participate in a wide variety of curriculum-based activities, they simultaneously acquire content knowledge, develop critical thinking skills and practise English language and literacy. The materials incorporate a 'learning to learn' approach, helping children acquire skills and strategies that will help them approach new learning situations with confidence.
 - **English for educational success.** To meet the challenges of the future, children need to develop facility with both conversational and academic English. From the earliest stage, *Bridge to Success* addresses both these competencies. *Bridge to Success* presents authentic listening and reading texts, writing tasks, and end-of-unit projects similar to those learners might encounter in English-medium and international schools. Emphasis is placed on developing the listening, speaking, reading and writing skills learners will need to be successful in using authentic English-language classroom materials.
- **Rich vocabulary development.** Building a large and robust vocabulary is a cornerstone to success in both conversational and academic English. *Bridge to Success* exposes learners to a wide range of vocabulary. Many opportunities for revising these words and using them in personalised, meaningful ways are woven into the activities and lesson plans.
 - **Individualised learning.** We approach learning in an individual way by both acknowledging the individual nature of the knowledge and background of each child and encouraging their specific input. We also provide for differentiated learning in the classroom by offering a range of activities of varying difficulty and guidance for tailoring activities to the needs of different learners. Detailed support for this is provided in the lesson plans in this book.
 - **Integrated assessment.** Throughout the course, teachers informally assess their learners' understanding of language and concepts. The Teacher's Guide provides suggestions for extending or re-teaching language skills based on learners' demonstrated proficiency. An end-of-unit Review in the Coursebook provides a simple-to-use evaluation measure: a quick progress check on learners' understanding of key ESL and early literacy skills. At the end of each unit, learners apply the skills and knowledge they have acquired as they work in groups to create and present a project. This provides teachers with an excellent performance assessment opportunity.

We hope that you and your learners will enjoy using these materials as much as we enjoyed developing them for you.

The *Bridge to Success* team

A Components

Bridge to Success offers the following components:

- The **Coursebook** provides the core input of the course and consists of twelve thematic units of study. Each unit contains between 17 and 18 lessons developed around a unifying theme. The materials feature skills-building tasks for listening, reading, writing and speaking, with each unit developing a language focus. In addition, there is a strong vocabulary-building element to the course.

Materials are aimed at the learner with all the experiences that they bring to the classroom.

Learners are encouraged to see the moral and social values that exist in many of the course texts, and find opportunities to reflect on these. Learners need to be exposed to many different forms of text topics and styles in order to develop the skills of assessing, interpreting and responding appropriately to content. Therefore the course aims to provide a variety of factual and fictional texts, dialogues and poetry, on a range of different topics, at the appropriate level.

- The **Audio CDs** include all the listening material needed for the Coursebook and Workbook. The listening material supports the Coursebook with listening and pronunciation. We recommend that learners are encouraged to use the Audio CDs at home to practise the songs and stories, and to show their parents what they know.
- The **Workbook** provides production, reinforcement and consolidation activities, as well as lead-in tasks to support the Coursebook.
- The **Teacher's Guide** includes the lesson plans for each lesson, providing guidance about how the Coursebook, Workbook and audio can be used in the classroom.

At the end of the Teacher's Guide, photocopiable activities (PCMs), cross-referenced in the lesson plans, provide extra support for selected lessons.

B Unit structure

Bridge to Success Grade 12 contains ten units, spread over three terms. Each unit in the Grade 12 Coursebook is structured as follows.

- A central topic or theme is developed over 17 or 18 lessons.
- Each core lesson uses the Workbook to develop learners' language skills, as well as explore and develop content knowledge.
- Practise and Prepare lessons provide an opportunity for consolidation and recycling of vocabulary and skills. These lessons can be used to informally assess learners' progress, address misconceptions, and inform subsequent teaching strategies.
- A Review lesson provides an end-of-unit check of learning, giving the teacher a clear and regular view of learner progress.

- Each unit ends with two Project lessons, which provide an integrated skills focus. The first lesson provides learners with a challenge, which they will complete in preparation for the second lesson. In the second Project lesson, learners present their projects, and are guided to reflect on their own learning.

C *Bridge to Success* features

Bridge to Success uses a range of features to guide and support teaching and learning. These are used throughout the Coursebook, and may also be used in the Workbook.

- **Language Tip:** A concise tip to help illustrate key language points. These can be used to model examples for learners, or for learners to refer to independently for support during an activity.
- **Writing Tip:** A concise tip to support the development of writing skills, which can be used as a teaching item or reminder for learners of key writing principles.
- **Use of English:** A tutorial of a grammar point, explaining when the point applies and providing modelled examples. These features often pre-teach language points, which learners then apply through a following activity.
- **Vocabulary:** A simple definition to help learners understand new vocabulary within an activity.
- **Did You Know?:** An engaging fact to inspire learners, which can be used to prompt discussion, or as an extension opportunity.
- **Listening Strategy:** A pre-listening briefing that will help learners apply a range of different listening techniques, and enable learners to choose appropriate listening strategies depending on the requirements of the activity.
- **Reading Strategy:** A pre-reading briefing that will help learners apply a range of different reading techniques, and enable learners to choose appropriate reading strategies depending on the requirements of the activity.
- **Speaking Tip:** A concise tip to support learners in developing fluency, which can be used as preparation for a speaking task.

D Lesson plans

The lesson plans include all you need to know in order to successfully teach using the new Coursebook materials. These provide guidance for leading into and out of activities in the Coursebook and Workbook, as well as teacher-mediated activities.

The lesson plans contain a number of common elements to support you in understanding the lesson aims, and adapting your practice to suit learners' needs.

- **Learning objectives:** Skill-based high-level objectives that are being developed through this lesson.
- **Learning outcomes:** What learners will be able to achieve by the end of the lesson.

- **Link to prior learning:** How this lesson builds on prior knowledge and skills; this can be used to identify skills or knowledge to refresh learners' understanding at the start of the lesson.
- **21st Century Skills:** The 21st Century Skills or Themes developed through the lesson. Skills are generally developed through activities, whereas themes tend to be developed through the content of the lesson.
- **Key vocabulary and key expressions/structures:** Active language introduced, used or developed through this lesson.
- **Common misconceptions:** Highlights common errors or misconceptions; these can be targeted and addressed with intervention to ensure learners have a solid foundation.
- **Differentiation activities:** Adaptations for activities to suit learners who need more scaffolding or challenge.
- **Learning styles catered for:** The different learning styles addressed through this lesson plan. You can adapt these lessons using the Teaching Strategies to address different learning styles, depending on the learning preferences of your class.
- **Assessment for learning opportunities:** To be completed by the teacher, these identify different assessment for learning techniques, which may be applied in the lesson.
- **Standards/SLOs:** The principal SLOs from the UAE Ministry of Education EIL Framework that are addressed through this lesson.

E Customising your lessons

This Teacher's Guide provides a comprehensive set of lesson plans to support you in using the Coursebook, Workbook and accompanying audio. However, each teacher and each class is different, and we encourage you to reflect on what works for you and your learners, and to tailor lessons to ensure high-quality outcomes.

Before using the Coursebook

- Warm up (Do warm-up etc.).
- Pre-teach and practise key language that learners will encounter in the Coursebook and Audio CDs. (Try to make learning experiences concrete, interactive, motivating.)

While using the Coursebook

- Keep learners engaged in an active way.
- Use the illustrations as a conversation starter – ask learners to discuss what they think the image shows, etc.
- Vary the group dynamics in the lesson: move from whole group response to individual response to pairwork, etc.
- Provide opportunities for learners to ask questions, as well as to answer them.
- Encourage learners to identify their own misconceptions and mistakes through questioning.
- Encourage learners to use language structures and vocabulary to talk about their own ideas, opinions and experiences.

- In class discussions, nominate a learner to write ideas on class charts. You can refer back to these charts in later lessons.
- Adjust your reading and writing expectations and instructions to suit the literacy level of your learners.
- Use the Teaching Strategies section in this Teacher's Guide to adapt the different types of activity in the classroom, and to customise feedback strategies.

Using the Workbook and further suggestions

- Use the Workbook pages related to the Coursebook pages.
- Depending on the ability of the learners, use the stretch and support differentiation activities in the lesson plans to adapt the activities as required.
- Do a Wrap up activity or game at the end of every lesson.

F Assessment

We recommend that you take the time and opportunity to observe and monitor the progress and development of your learners. Many opportunities for informal assessment are provided through the Practise and Prepare lessons and end-of-unit projects as well as regular self-assessment opportunities.

At the beginning of the year, create individual portfolio folders to keep work that shows how the learners have been meeting the curriculum objectives. Use the portfolio to create a feeling of achievement and pride in learners about what they have achieved over the year. Keep this portfolio for parent–teacher meetings and send it home to show the parents/carers either at the end of each term or the end of the year. You might also want to include a letter to parents/carers outlining what the learners have achieved over the year.

Assessment for learning

Assessment for learning is a teaching strategy based around continual informal assessment of learner understanding, which then informs subsequent teaching decisions. Each lesson plan provides space and opportunities for you to apply assessment for learning techniques.

- **Observations:** Observing learners during tasks can help identify confidence, misconceptions, engagement and understanding of the task itself. This allows opportunities for individual interventions to address immediate learning needs.
- **Student self-assessment:** Self-assessments based around can-do statements provide an insight into learners' confidence of their own knowledge and skills, which can be used to address common or individual perceived weaknesses. It's important to combine self-assessment with other forms of formative assessment to ensure learners' confidence matches the accuracy of their understanding.
- **Oral questioning:** One of the simplest methods of eliciting feedback, oral questioning can help identify individual and group understanding. Questions may be directed at individual learners, groups of learners, or the whole class, although the teacher needs to

make sure the feedback sessions are not dominated by the most confident learners. The feedback can inform whether learning points are reinforced, or whether the class is ready to move on.

- **Peer assessment:** Peer assessment develops learners' metacognition and their ability to articulate rules and conventions. The teacher should provide a model of peer assessment at the start of the activity to set out parameters, and to demonstrate constructive feedback. Peer assessment can be incorporated in a variety of ways:
 - Combined with oral questioning, peers can assess whether a learner's answer is correct, and if not, be encouraged to provide a correct answer and – if relevant – an explanation of why this is correct. This technique can help learners internalise and deepen their understanding through articulating rules and conventions in their own words.
 - As a differentiated activity, pairing able learners with those who need more support. The more able learners can provide support, reinforcing the strength of their own understanding through articulation and explanation.
 - As an extension to presentations, where peers ask questions of the presenters. This can help teachers assess the depth of understanding of both the presenters and the audience, and identify learning points to reinforce as a result.
 - Written work may be peer assessed, providing that learners have a clear marking guide to follow. Activities requiring objective answers (e.g. true/false, matching, etc.) can be facilitated quite easily, whereas more open-ended writing tasks may require dictionaries and teacher input to ensure the peer assessment is successful.
- **Quizzes:** Quizzes provide an objective measure of learners' knowledge, and can be run as competitive activities (e.g. backs to the board, see Teaching Strategies), paper-based tasks (e.g. an informal test) or online (e.g. a multiple-choice test, with instant feedback). Consideration needs to be given to the style of question (free response, multiple choice, etc.) and the breadth of the domain tested (e.g. whether the quiz tests a specific language point, the lessons' content, or broader). Regular use of quizzes can help build a data-informed picture of how the class is progressing, and whether there are areas of individual or collective weakness that need to be addressed.
- **Student presentation:** Presentations require learners to demonstrate their understanding and application of language. Misconceptions can be identified through directed questioning, which may be broadened out to the whole class through discussion, and addressed immediately through intervention.
- **Written work and feedback:** When learners submit written work, they should receive feedback as soon after submission as possible. Feedback should be encouraging, but identify and address errors and misconceptions. Common misconceptions or errors in the class can be addressed through whole-class

teaching or activities, whereas individual errors should be addressed one-on-one through feedback.

- **Feedback:** Regular feedback is a key feature of assessment for learning, and should be a part of each activity. An important function of feedback is to ensure learners acquire knowledge and skills correctly and accurately, so each lesson builds on solid foundations. Feedback can directly and informally reinforce learning points where required (e.g. correcting common spelling errors, pronunciation issues, grammar misconceptions, etc. during the activity), or include more formally structured teaching of specific points (e.g. addressing a misconception or weakness common to the class).

In addition to the highlighted techniques in the lesson plans, the following strategies can be applied to embed assessment for learning in the classroom.

- Using objectives and outcomes for measurable learning or meeting set criteria. Where learning outcomes are clearly measurable (for example, learners will be able to write a sentence in the Past Simple and the Past Continuous tenses activities that require learners to demonstrate these specific outcomes can be used to assess learners' mastery of the skill or knowledge.
- Using technology to provide instant feedback. If your class has individual access to digital devices, a range of simple-but-powerful tools are available to support monitoring of individual and group understanding. Quizzes can provide a change of pace in the classroom and an element of competition (to which learners often respond well). Instant feedback can then be used to inform your teaching; is the class ready to move on, or does a key learning point need to be reinforced? Technology services supporting this technique include:
 - Kahoot (<https://getkahoot.com/>) enables you to create a learning game that can be used in the classroom. Requires individual device access and an Internet connection.
 - Nearpod (<https://nearpod.com/>) enables you to create an interactive presentation to share with your learners, and collect data. Nearpod can be used in the classroom, or as homework. Requires individual device access and an Internet connection.
 - Socrative (<http://www.socrative.com/>) enables you to use real-time questioning and real-time data to assess learner understanding. Requires individual device access and an internet connection.

G Common mistakes

The Cambridge English Corpus is a multi-billion word collection of written, spoken and learner texts; it is the largest of its kind in the world. The Corpus breaks down into several smaller corpora, including the Cambridge Learner Corpus, a unique 50 million word collection of exam scripts written by learners all over the world. Analysis of this resource has identified a number

of common misconceptions and errors made by Arabic learners of English at CEFR A1, A2 and B1.

Spelling errors

Doubling and clusters of vowels appear to present a particular challenge for Arabic-speaking learners – for example, *quiet, because, friend, people, restaurant, beautiful, country, receive*. Silent consonants (*should, which, etc.*) and the silent *e* (*there, before, etc.*) also appear in the list of frequently mis-spelled words.

Target Word	Errors (in order of frequency)
because	becouse, becaus, becuse, beacuse
friend	frind, freind
different	diffrent
people	pepole, peaple, peopl, peopl
interesting	intersting, intresting
restaurant	resturant
beautiful	beatiful, beutiful
there	ther
before	befor
with	withe, whit
country	contry, contre
their	thier
together	togather
like	lik
receive	recieve, recive
which	wich
wishes	weshes, wiches, wishes
important	importent
should	shoud,
tomorrow	tomorow, tommorow, tommorrow
always	alway, allways

Missing a or an

This error is seen most frequently when an adverb and adjective intervene between the needed indefinite and the noun. This error is most frequently preceded by *it is* or *it's*.

- Example error: *It's very nice place.*
Corrected: *It's a very nice place.*

Missing the

The is frequently missing before nouns. Common nouns associated with this problem include: *same, UK, countryside, centre, internet, wedding, channel, cinema, city, museum, station, news, afternoon, same, weekend, USA, first, time, other*.

In addition, *the* is often missed before ordinals at the start of a sentence.

- Example error: *First thing I would like to tell you is that I love shopping.*
Corrected: *The first thing I would like to tell you is that I love shopping.*

Missing pronouns

It, you and *I* are the most frequently missing pronouns in the following instances:

- Missing *it* as an object pronoun: *My father gave me it when I was 13 years old.*
- Missing *you* as an object pronoun: *I want you to come with me.*
- Missing *I* as a subject pronoun: *I hope I see you soon.*

Missing conjunction

And is a common omission for Arabic learners.

Examples include:

- *It was full of flowers and green trees and there were places for cycling.*
- *There is a big sitting room, and there is a sofa, an armchair and a bookcase.*
- *My friend likes football and swimming.*

Missing be before adjectives in descriptions

The copula *be* presents a particular challenge as there is no *to be* in Arabic in the present tense. *Be* is the only significantly omitted verb, and because this error occurs with the present simple and progressive tenses, it needs particular attention from an early stage.

Frequent instances of this omission include:

- Missing *be* before adjectives in descriptions.
 - *I liked the competition because it was very interesting.*
 - *I will be very happy if you come*
 - *The theatre is near my house*
- Before the prepositions for talking about when or where something is or happens.
 - *My house is next to the bus station, opposite the bank.*
 - *Dinner time is at 6 o'clock in the evening.*
- Before *-ing* forms in present continuous.
 - *The place I am staying in is amazing.*
 - *She is studying with me.*
 - *So we are planning to go to that park together.*

Verb agreement with be

As above, the lack of an equivalent for *to be* in the present tense in Arabic is likely the source of the frequency of errors around verb agreements involving *be*.

- Example error: *Two men was near his car.*
Corrected: *Two men were near his car.*
- Example error: *Young people is important in society.*
Corrected: *Young people are important in society.*

Using in instead of at or on, and vice versa

Using *in* instead of *at* is the most frequent wrong-preposition error, followed by using *in* instead of *on*.

The most frequent instances of *in* instead of *at* concerns the following:

- With clock time when talking about times or occasions.
Example error: *The weather is very good in this time of year.*

Corrected: *The weather is very good at this time of year.*

- With *house* and *home*.
Example error: *Can you come to dinner with me in my house?*
Corrected: *Can you come to dinner with me at my house?*
- With *work*, *college*, *school*, *university*, etc.
Example error: *I met her in my work.*
Corrected: *I met her at my work.*
- In the phrase *at the weekend*.
Example error: *I really enjoyed shopping in the weekend.*
Corrected: *I really enjoyed shopping at the weekend.*
- With events, such as party, wedding, concert, etc.
Example error: *See you in the party.*
Corrected: *See you at the party.*

The most frequent instances of *in* instead of *on* concerns the following:

- With days of the week.
Example error: *I will visit you in Sunday at about 2 o'clock.*
Corrected: *I will visit you on Sunday at about 2 o'clock.*
- TV.
Example error: *Sometimes I see old serial dramas in TV.*
Corrected: *Sometimes I see old serial dramas on TV.*
- Day, birthday, holiday.
Example error: *We had a good time in this holiday.*
Corrected: *We had a good time on this holiday.*

Punctuation with apostrophes

Apostrophes are a common problem area for most groups of learners, not just learners whose first language is Arabic. The most frequent error types are listed below.

- Confusion between *I'm* and *I am*, resulting in *I'am*.
Example error: *I'am writing to tell you my news!*
Corrected: *I am writing to tell you my news!*
Or *I'm writing to tell you my news!*
- Confusion between *it's* and *its*.
Example error: *I've got a new phone. I like it's camera and it's screen.*
Corrected: *I've got a new phone. I like its camera and its screen.*
- Forming plural nouns with apostrophes, which may be a result of confusion with possessive 's'.
Example error: *My friend's gave me a mobile, but my parent's gave me a computer.*
Corrected: *My friends gave me a mobile, but my parents gave me a computer.*
- Using *its* in place of *it's*.
Example error: *Its a big place and its nice as well.*
Corrected: *It's a big place and it's nice as well.*
- Possessive *s* with missing apostrophe.
Example error: *My friends name is Dalal.*
Corrected: *My friend's name is Dalal.*

Overuse of *it* as a pronoun between subject and verb

This is a particularly frequent error for Arabic learners, although it is becoming more common among native speakers, especially in relative clauses.

- Example error: *You know I don't know if Oman's weather it will be very good.*
Corrected: *You know I don't know if Oman's weather will be very good.*
- Example error: *You can catch the bus that it stops across from our house.*
Corrected: *You can catch the bus that stops across from our house.*
- Example error: *The information you sent it to me by email was great.*
Corrected: *The information you sent to me by email was great.*

Over-long sentences

Sentence boundaries are a problem area for all learners (not just those with Arabic mother tongue), but not beginning a new sentence when required is by far the most frequent punctuation error of Arabic speakers. Run-on, or overly long sentences are common, even at lower levels where learners' language normally limits them to simple short sentences. Learners may construct short sentences, but neglect punctuation to mark the start and end of sentences.

Teaching Strategies Grades 10–12

Teaching Strategies Grades 10–12

This section provides definitions for a range of different teaching strategies that can be used in the classroom, as well as information on the rationale for each activity.

Teacher-led strategies (direct instruction)

Guided discovery

The teacher leads and supports the learners in the acquisition of skills and knowledge through modelling and step-by-step practice, until learners are able to apply the skills and knowledge independently.

Learners may be provided with an example of a language item in action, for example in a piece of text, and they are then supported and encouraged by the teacher to discover and summarise the rule themselves.

Independent reading

Independent reading encourages learners to read silently on their own with minimal guidance or interference from the teacher. It provides opportunity for learners to practise reading skills building fluency and confidence. They expand their knowledge as readers and build stamina. Learners may be provided with specific texts or a selection of varied reading material. For independent reading to be successful and enjoyable, learners should be able to access it at a 98% accuracy level.

Visual stimuli

Visual stimuli are an important component of individual learning materials, as well as of the classroom environment as a whole. Visual stimuli provoke discussion and engage learners in the lesson focus.

Learners are provided with visual stimuli such as images, cues, objects or environments to support them in making associations and connections in processing, memorising and recalling information.

Cloze

Cloze is used to assess literacy skills such as predicting meaning, developing vocabulary, applying prior knowledge and understanding textual information.

- Learners fill in or complete letters, words, and phrases that are deliberately omitted from written or oral text.
- For support, learners may be separately provided with the letter, words and phrases that are required to complete the text.

Organised grouping strategies (cooperative)

Jigsaw

The jigsaw strategy uses the gradual culmination of smaller learner groups into larger groups to piece together information for a task.

- The teacher arranges the learners into small groups.
- Each small group or individual group member is assigned a different piece of information.

- Group members then join with members of other groups assigned the same piece of information, and research and/or share ideas about the information.
- Eventually, learners return to their original groups to piece together a clear picture of the topic at hand.

Mentoring

Learners are supported by an experienced or knowledgeable person who acts as a mentor. The term 'mentor' may refer to teacher-advisors, peer tutors, and community mentors in a variety of settings.

- The teacher works with the mentor to create a support programme for the learner, which may be short-term or long-term depending on the learner's needs and the task requirements.
- The mentor provides one-on-one advice or training to support the learner in exploring ideas, taking risks, testing conclusions and obtaining feedback.

Peer practice

Learners work together in pairs or small groups (allocated by the teacher) to help each other to review, drill and rehearse to check knowledge, deepen understanding and develop skills.

Peer teaching

Learners (individuals or small groups) who are competent in a skill, or knowledgeable in a topic act as 'experts' to teach what they know to their peers.

Socratic discussion

This process encourages divergent thinking rather than convergent. Participants feel a certain degree of emotional safety when they understand that this format is based on discussion and not debate. The goal is for learners to help one another understand the ideas, issues and values reflected in the text. They are responsible for facilitating a discussion around ideas in the text rather than asserting opinions.

- Learners are given the opportunity to examine a common piece of text.
- After reading the text, open-ended questions are posed and discussed.
- Open-ended questions allow learners to think critically, analyse multiple meanings, and express ideas with clarity and confidence.

Debate

A debate is a structured argument during which two teams of learners speak alternately for and against a controversial topic. It is a successful strategy used for improving speaking skills and is particularly helpful in providing experience in developing a convincing argument. Debates can be formal or informal.

- The teacher provides, or decides in collaboration with learners, a controversial topic.
- The teacher divides the class into two teams – those who agree and those who disagree with the controversial topic.

- Learners are given time to research, make notes and prepare their arguments.
- Learners from each team take turns to present their arguments as clearly and logically as possible.

Interview

A person (the interviewer) engages in a conversation with another (the interviewee) in order to gather personal information and opinion, practical experience, and advice. The person interviewed is often an expert or a person in the role of an expert. The person being interviewed could be a teacher or learner in role, or an external expert.

Collaborative learning

Learners work together in pairs or small groups to solve a problem, complete a task, or create a product. They participate in thoughtful discussion, and develop a more positive attitude about learning and each other by working together.

- Learners engage with one another and are responsible for making sure that everyone understands the task.
- The teacher facilitates collaborative learning by organising the learners into pairs or small groups that complement one another and by supporting the development of the group task.

Active strategies (activities)

Backs to the board

This is a competitive activity format that can be used to check vocabulary or knowledge.

- The teacher divides the class of learners into two or three groups.
- One learner from each group sits in a chair with their back to the board, facing their group.
- The teacher or a chosen learner writes a word on the board so that the learners sitting with their backs to the board cannot see the word.
- Each group provides hints to the learner from their group with their back to the board, who in turn attempt to guess the word.
- The first one to guess the word gets a point for their team.

Role-play

Learners act out or perform a particular role in order to explore and dramatise the thoughts, feelings, and experiences of another person in a simulated situation.

- The role-play may be conducted between two learners, a small group or as a whole class led by the teacher.
- Role-play may be performed and presented to the whole class where other learners may be invited to make comment and analysis on the content.
- Some role-plays may be simple re-enactment but role-play can also include learners' own development and interpretation of a given scenario.

Experiential learning

Experiential can be defined as 'learning through reflection on doing'.

It is vital that individuals are encouraged to directly involve themselves in the experience, and then to reflect on their experiences using analytic skills, in order that they gain a better understanding of the new knowledge and retain the information for a longer time.

Games

A game may be played using print, digital media, simulation or contest (competitive or cooperative) according to a clear set of rules in order to challenge and motivate learners to learn. This strategy is highly engaging, but all learners should understand the objectives and process of the game before playing.

Reading diary

The use of a reading diary or a response journal encourages learners to regularly write personal reactions to texts, activities, and experiences in any subject area.

Learners' reactions may be formal or informal and include exploring, analysing, questioning, interpreting and appreciating new ideas and experiences.

Reading diaries may be kept as a personal account shared between the learner and the teacher or may be used to present ideas and reflections to the class.

Learning log

A learning log is a diary in which learners record their experiences, efforts and feelings. Learners reflect upon what they are learning and how they are going about learning it. Learning logs are useful because they promote metacognition. They enable the teacher to understand learners' perceptions and reactions to the materials being taught.

- The teacher provides guiding questions to encourage the correct use of the learning log. A limited number of questions from which learners may choose and a selection of questions that learners are required to respond to.
- The teacher provides time for learners to write in their learning log at regular opportunities.

Journals

A journal is an informal writing notebook used for a multitude of relaxed and creative writing opportunities. Learners are encouraged to write in a more fluid and natural manner than in other writing tasks. The teacher may encourage writing activities such as personal reflections, character writing, vocabulary stories or any other relevant topics.

The teacher may or may not mark the journal entries for accuracy but instead might provide a written response to the content. The teacher's response becomes similar to an ongoing dialogue with the learner and encourages them to write freely and confidently.

Some teachers extend the concept of a writing journal to encourage learners to contribute written articles or blogs for the online school blog or website.

Book reports

Writing a report about a book they have read encourages learners to think and write critically.

Learners practise describing, sequencing, expressing and justifying opinions whilst reviewing, summarising or commenting upon a book they have recently read. The teacher may provide a specific format or structure the learners should follow which may include details such as: book details, setting, characters, story, and reader's thoughts.

Projects/presentation

Learners learn about a subject by working for an extended period of time on a project to investigate and respond to a complex question, challenge, or problem. Project tasks contrast with paper-based, rote memorisation, or teacher-led instruction that simply presents established facts or portray a smooth path to knowledge by instead posing questions, problems or scenarios. The project may be set by the teacher or may have initial input from the learners.

- The teacher should support the project by providing success criteria and access to resources that the learners may need to facilitate and develop their project.
- Projects may be presented to the class and learners may be asked to explain the process and outcome of their project.

Multimedia learning (video)

Learners may access ICT-based teaching resources provided by the teacher to facilitate learning such as audio and video extracts used within lessons to demonstrate vocabulary and speaking. Learners may also use ICT-based resources, such as interactive software or audio devices to record their own dialogues, to create projects and complete tasks.

Hot seating

The teacher decides on a specific conversation topic to frame the activity. This topic may be related to the current Coursebook unit (e.g. shopping, health care, holidays) or focused on a particular language structure being studied (e.g. the past tense, conditionals, or descriptive vocabulary).

- One learner volunteers or is selected by the teacher to sit in the 'hot seat' chair at the front of the room.
- While in the hot seat, the learner has control of the class. They are responsible for selecting learners who have a question and addressing them directly by name, rather than looking at the teacher to facilitate the communication.
- The audience is responsible for listening to one another's questions and helping one another to ask appropriate questions, to incorporate pre-determined themes, vocabulary or grammar structures as much as possible, and to avoid repetition of questions.
- The teacher acts as a facilitator and support to provide prompts, model dialogue and encourage the progression of the session.

Reading race

The teacher prepares questions about the details of a text; these questions should be objective and have one clear defined answer. This activity can work both

before learners read a text and as a review activity when learners have finished the reading.

- The teacher organises learners into pairs with each learner having a copy of the text in front of them. Enough copies of the questions should be available for each pair.
- Learners are provided with the first question and race to find the correct answer. Once found, one partner should run their written answer to the teacher.
- If the answer is correct, learners are provided with the second question.
- The process is repeated until a group has answered all of the questions correctly.

This activity can be adapted to incorporate many versions of learners in pairs or small groups 'racing' one another to read pieces of text and find information as guided by the teacher.

Running dictations

Through this activity learners practise reading, speaking, listening, and writing; have to work together; and are also responsible for checking their own work.

- The teacher prepares two short texts, each taped to a wall.
- Learners are organised into pairs, with one learner being the writer and the other being the runner.
- The runner must run to the board where the first paragraph is displayed, read the text, run back to his or her partner, and repeat what he or she read.
- The writer's job is to listen to the runner and write down what is said. Usually it takes many trips to and from the board for the runner to relay the entire paragraph to the writer.
- When most groups are done, the writer can check the passage against what is displayed, and then roles are reversed and the second paragraph is used.

Find someone 'who...'

The teacher tells the learners that they will ask each other questions. The goal is to ask everyone in class until the learners find someone who does that activity, has that characteristic, or can answer the question.

- The teacher prepares a selection of 'find someone who...' statements using vocabulary or concepts that relate to the current unit of study. For example, if you are teaching a unit on jobs: 'Find someone who can list tasks a farmer might have', 'Find someone who can describe the job of a doctor', etc.
- The teacher creates a variety of statements so that it will be easy to find a person with some characteristics, but not so easy to find others.

Strategies to promote thinking and problem solving (analysis)

Brainstorming

Learners share and record questions, ideas, and examples that come to mind (without judgement or censure) about a central idea, topic, or problem. Brainstorming is often presented visually using colourful posters that can be created by learners in small groups and presented to the rest of the class.

Mind map

A mind map is a visual and memorable way to organise, develop and record ideas. It is often created as a large colourful poster with the central key concept, idea or question placed in the middle of the diagram. Ideas and thoughts are then added as branches that radiate from the central point.

When ideas are added they can be grouped and connected through the system of branches. Using colours, symbols, words and images appeals to different learning styles and makes the process memorable for learners. Using a mind mapping strategy is helpful for making sense of new concepts, planning, organising, analysing and communicating ideas, thoughts and information.

Problem-solving

Learners use a variety of reasoning skills (e.g. inductive reasoning, deductive reasoning, exploring contrary examples, etc.) led by the teacher to engage a line of inquiry.

Problem-solving includes generating questions, making and carrying out a plan, testing hypotheses, constructing organised proofs and arguments, justifying conclusions, and eventually resolving a problem or mystery.

Opinion forming

Learners may receive a quotation from a text (before it is read) that includes evidence for one side or the other of an issue or argument. Learners share their quotations and their evolving opinions, with reasons and evidence to support them.

Alternatively the teacher makes a statement and encourages learners to form an opinion for or against the statement. Learners may be asked to move physically to opposing sides of the classroom to demonstrate their opinion. The teacher may then ask questions to encourage learners to justify and rationalise their opinions.

Reflection

Learners think deeply or carefully about information, an investigation, or problem in order to clarify their understanding in light of previous experience. Reflection may:

- include both formal and informal ways to think about the 'why' and 'how' of learning (e.g. in a journal or response log)
- incorporate wait time before learners respond to a question
- require learners to complete a criteria-based checklist as a group following an activity.

Problem-based Learning (PBL)

- The teacher sets the learners a problem-based task.
- Learners are organised into small groups by the teacher, and then brainstorm ideas. They identify what they know about the problem and what they

don't know, but must learn, in order to solve the problem.

- Learners then develop an action plan for research, and discuss the topics and concepts researched, eventually coming to some agreement on the best resolution.
- The teacher acts as a facilitator to guide the learners through the process, ask relevant and probing questions and provide resources that the learners need to solve the problem-based task.

Challenge-based Learning (CBL)

CBL is a collaborative learning experience in which teachers and learners work together to learn about compelling issues, propose solutions to real problems and take action. The approach mirrors the 21st century workplace and requires learners to reflect on their learning, the impact of their actions and publish their solutions to a wide audience.

- The teacher works with the learners to identify the big idea.
- Learners identify guiding questions (what they need to know) and identify resources and activities to answer these.
- Learners research, document and develop a solution and then identify steps to carry out their plan.
- Learners implement their solutions, measure outcomes, reflect on what worked and determine progress made.
- Learners are encouraged to keep written, audio or video journals throughout the process and use these to share their projects with a wider audience.

Task-based Learning (TBL)

In a task-based learning scenario, the lesson is based around the completion of a central task and the language studied is determined by what happens as the learners complete it. It enables more varied and natural exposure to language and a strong communicative approach.

- The teacher introduces the topic and gives the learners clear instructions on what they will need to do during the task. The teacher might provide some useful vocabulary to support the learners.
- Learners complete the task in pairs or groups whilst the teacher monitors and offers encouragement.
- Learners prepare a short oral or written report and feedback to the whole class on what happened during the task.
- The teacher highlights relevant parts of the report and uses this to inform areas for the learners to participate in further practice.

This quiz just gives a general idea about how green learners' behaviours are, however, there are a number of online calculators that give more detailed answers. For instance, the Dubai Municipality has an Ecological Footprint calculator (how many worlds you are using) and the WWF has one (gives number of tonnes of carbon dioxide you produce). Both are fairly easy to use and understand. Also, as these give more detailed information, they would give learners a better understanding of how they compare to other people.</p> <p>2. 	Answer		
	Learners own, but should include the following: In text referencing – when using a direct quote, the page number of the text should be given after the year. Paraphrased information does not need a page number, the year always goes in the brackets. All references are written out in full after the text. The surname/family name of the author goes first followed by the initial of the first name. The title of the book or article comes next, followed by the journal title and then by whom it was published and where. Note there are two different types of reference book and articles in a journal.

Some learners may remember parts from the listening now, encourage them to note down things they remember before they listen and they can listen, check and expand.

- Learners listen and make notes.
- In pairs, learners check their answers.

CORE

Feedback

Draw the table on the board and learners come to the board and write notes for each section and speaker. As a class, check what has been written for accuracy / error correction if necessary.

Answers

	<i>Noora</i>	<i>Asma</i>	<i>Hanan</i>
<i>Workload</i>	“Through the roof” Lots of marking	Doesn’t say	“taking over my life” It’s busier when there are deadlines
<i>Holidays</i>	Long summers “perk”	Not as long as teacher	Doesn’t say
<i>Working Hours</i>	7am - 10pm sometimes more, e.g. inspections Weekend marking	Shifts Routine changes Weekends No social life	Longer hours near deadlines, makes it hard to see friends
<i>Words used to describe job</i>	energetic stressful “love what I do”	Works on own Not boring Also loves what she does	stressful rewarding worthwhile vocation

Differentiation activities (Support):

- Tell learners which parts of the table remain blank AND/OR Let them refer to the audio transcript AND/OR Let them partner up or in groups of three so each person just listens to one of the speakers and takes notes, they then combine their notes to complete the table.

Differentiation activities (Stretch):

- After listening, encourage learners to transcribe notes into full sentences, encouraging them to use language to compare and contrast where possible.

Workbook page 35

Workbook: Activity 1

- Explain that learners are going to read three extracts from the conversation between the three women talking about their jobs.
- Learners need to listen and match the phrases in the word pool box to the appropriate space in the extracts.
- Advise them to read what comes before and after each space as this will give them the context clues they need.
- Explain any lexis where necessary.

CORE

Feedback

Learners write answers on the board.

Answers

- a. workload; b. perk; c. shifts; d. social life; e. routine; f. deadline; g. stressful; h. rewarding; i. vocation

UNIT 10

Track 1

Bader: Good morning and welcome to the Breakfast Show. This morning we're talking to Maitha Al Falahi who has recently started a campaign in her local neighbourhood to raise awareness regarding individual carbon footprints and our personal impact on the environment. Welcome Maitha.

Maitha: Good morning, Bader.

Bader: Good morning. So, Maitha, tell us about your campaign and how it started.

Maitha: Well, Bader, it actually started at school.

Bader: Oh really?

Maitha: Yes, I was in a science class, I think, and we were studying climate change. I remember sitting in class and learning about the changes that have happened to our environment in really, very recent years. There are many animals that are now endangered due to the changes in global temperatures, ice caps are melting and there's been a huge increase in extreme weather events. Lots of people all over the world are suffering as well as animals because of these changes, and I remember thinking how awful it all is, and how huge a problem it is. I mean, it affects so many people and animals all over the world.

Bader: Mhmm, that's true. It's a big problem.

Maitha: It is. And of course, we learnt about how it's all caused, you know, greenhouse gas emissions, like carbon dioxide, which are caused by pollution from industries and people of course; the use of non-renewable energy sources, such as fossil fuels. The reduced capacity of our planet to convert carbon dioxide into oxygen as a result of deforestation. And, the amount of waste we create that cannot be recycled or is not recycled, but ends up in our seas and oceans or a landfill. But, it all felt like such a huge problem and so far away, I mean, I haven't really been affected by any of these changes in the UAE. Why should I care what is happening to people I don't know in other countries? I mean, it's out of my hands anyway, right? This is bigger than I am, it's down to world leaders, governments and businesses to make the change, not me. I mean, I'm just one person, what difference can I really make?

Bader: There are many that would agree with you there, I'm sure, Maitha.

Maitha: Well, I sympathise with them, because it is very easy to just shrug your shoulders, hold up your hands and say "What can I do? I am one person."

Bader: But how can we change this mindset?

Maitha: Hmm what can I say? I guess what we have to do is bring people's attention to the large impact these changes are having on people and animals, I mean, it's really devastating. And, encourage people to look at climate change on a personal level, like, what contribution am I personally making to this problem.

Bader: Mhmm, but how do we do that? How do we make people see this on a personal and individual level?

Maitha: Well, something that I did, which worked for me, was to complete one of those questionnaires that calculate your personal carbon footprint.

Bader: Oh yes, I've heard of them. And what was your result?

Maitha: Err, I'm embarrassed to say! I was really quite shocked by the result. It's amazing that our habits and routines can result in a large carbon footprint, but by making some very small changes, we can reduce our contribution quite considerably.

Bader: So, Maitha, would you say that individual changes are more important than those made by governments and big businesses?

Maitha: Hmm that's an interesting question, Bader. In a way, yes, I think individual changes are more important, because if we, the people, begin to change our thinking on the environment and make more sustainable choices, this will ultimately lead to changes in government policy and decision making. It will cause the big change we want, if we want it enough and are prepared to work hard for it.

Bader: Thank you, Maitha. After the break we'll be taking calls from you, our listeners, regarding this issue. Stay tuned.

Track 2

Maitha: Yes, I was in a science class, I think, and we were studying climate change. I remember sitting in class and learning about the changes that have happened to our environment in really, very recent years. There are many animals that are now endangered due to the changes in global temperatures, ice caps are melting and there's been a huge increase in extreme weather events. Lots of people all over the world are suffering as well as animals because of these changes, and I remember thinking how awful it all is, and how huge a problem it is. I mean, it affects so many people and animals all over the world.

Bader: Mhmm, that's true. It's a big problem.

Maitha: It is. And of course, we learnt about how it's all caused, you know, greenhouse gas emissions, like carbon dioxide, which are caused by pollution from industries and people of course; the use of non-renewable energy sources, such as fossil fuels. Track 3

Bader: But how can we change this mindset?

Maitha: Hmm what can I say? I guess what we have to do is bring people's attention to the large impact these changes are having on people and animals, I mean, it's really devastating. Track 4

Interviewer: Good afternoon listeners, we have a special programme for you today. With me is one of our frequent guests, Hassan of the East Gulf Conservation Council based in Umm al Quwain. For those of you who do not recall, the EGCC is an organisation that conducts research on the ecosystems of the Eastern Gulf region, specifically in the UAE and Oman, and works to raise awareness about how to conserve these important places.

Hassan: Good afternoon Saif, I appreciate you inviting me back to your programme. I am thrilled to be able to talk to your audience about the different ecosystems we have been researching. I also want to update you on some on some important projects which we will have finished by the end of this year!

Interviewer: Great! Well, to start with, why don't you remind our audience what an ecosystem is?

Hassan: Certainly. Ecosystems are everywhere, in fact your home, work or school could all be considered ecosystems. Basically, an ecosystem is an area where all the things that live in it are connected to each other on some way.t...

Track 5

Interviewer: Thank you, I am sure our listeners really appreciate that definition. Could you speak to us about what you are working on at the moment?

Hassan: Good question. Okay, that sounds good. Well, right now we are currently doing research aimed at reintroducing the Arabian leopard back into ecosystems in the UAE and parts of Oman. Arabian leopards are very hard to see in the wild. In fact, in the UAE the leopard is considered to be extinct, which means that it is no longer found in the wild. If they had been protected earlier, they might still be in all of the Arabian Peninsula. However, if you go to Oman, you can visit the Jabal Samhan Nature Reserve on the southern coast. There you can still see leopards in their natural habitat. While there, I recommend you visit another fascinating site, the Salalah ecosystem.

Interviewer: Tell us some more about these leopards.

Hassan: Ummm... sure. the Arabian leopard is a big cat, much bigger than a house cat. They are usually pale to dark yellow with black spots, though the males can weigh up to 30 kilos, and females a little smaller at 20 kilos.

Interviewer: Wow, what do they eat to get so big?

Hassan: They are carnivores, which means that they only eat meat. They mainly eat Arabian gazelles, porcupines and small rodents. They are also nocturnal, which means that they are mainly active at night.

Interviewer: They sound fascinating! So, if you want to see one of these big cats in the wild, you have to go to... I think you said Salalah? I have heard of Salalah, isn't that a city in Oman?

Hassan: Yes, it is a city, but it is also a fascinating ecosystem as well. While most of the Arabian Peninsula has an arid desert ecosystem, for three months of the year this region in southern Oman turns into a tropical rainforest! The monsoon season, called the Khareef season, lasts from July to September and brings around 55 mm of rain, or nearly half the annual rainfall of the region. When the rain falls, the brown desert blooms into a beautiful, green, lush rainforest. Right now, the Khareef season is over. But, if you had gone there two weeks ago, then you may still be there today! It is very hard to leave.

Interviewer: Amazing! I am sure our listeners want to know more! What can you tell us about the different species of flora and fauna in the region?

Hassan: As for fauna, we already talked about the Arabian leopard that lives on the nature reserve. Some domestic animals like camels live there as well. Another

animal that we think at one point must have roamed all over the Arabian peninsula throughout the Arabian Peninsula but is now limited to a small area is the Arabian oryx.

Interviewer: What is a oryx?

Hassan: The Arabian oryx is a medium sized antelope with long horns. It is an herbivore, meaning that it only eats plants, unlike the Arabian leopard that we talked about earlier. They live in herds of up to 100 oryx, though most live in herds of around 10.

Interviewer: So, is Oman the only place where these animals are found?

Hassan: Thankfully no! Over the past several decades, the Arabian oryx has been introduced to the UAE and Qatar. There is even a current effort to reintroduce them to the island country of Bahrain. In fact, if the project had started earlier, then there might be more than 1000 oryx in Bahrain today! But as it is there are over 100 right now.

Interviewer: That sounds like a very important project! How about the flora in Salalah?

Hassan: Well perhaps the most famous tree that grows in the region is the *Boswellia sacra* tree, more commonly known as the frankincense tree. This small, shrub-like tree, which grows on the slopes of the mountains in southern Oman, is probably most famous for its resin. The dry sap from the frankincense tree is harvested and turned into an aromatic resin that is used in perfumes and incense.

Interviewer: Ahhh...that must be the beautiful smell that you often come across in the malls in the UAE!

Hassan: Exactly, though this has come at a cost. The tree currently is under threat due to overexploitation. Thankfully, however, 20 years ago we knew that if we continued to commercialise the trees, we very well might not have been able to see them in the future.

Interviewer: That is awful, it will really make me think the next time I smell that fragrant aroma! Well, we are almost out of time. Is there anything that you would like to add?...

Track 6

Speaker 1: Good Afternoon, and welcome to our panel on Recycling and the Environment. We would like to welcome Dr. Asma from the Dubai Institute of Environmental Research. DIER is a leading research institute on the fight for a cleaner world. Dr. Asma has been heading up a group of scientists who are researching the Great Pacific Rubbish Patch, and her talk will focus on that topic.

Dr. Asma: Thank you Dr. Rashed. Scientists and environmentalists have described a vast patch of floating rubbish in the Pacific Ocean. A large proportion of waste ends up in the oceans and as it is swept out to sea a circulating current, the north pacific gyre, accumulates this rubbish and deposits it in two massive areas which have been called the 'great pacific garbage/rubbish patch'.

Around 80% of the debris comes from North America and Asia while the remaining 20% comes from boats, shipping containers and oil rigs. While there are many different types of rubbish discarded into the ocean, plastic makes up the majority as it is cheap to produce and durable. The problem is it does not biodegrade. Instead, it simply breaks down into smaller and smaller pieces, and turns parts of the ocean into a murky soup. The rubbish patch has been described in different ways. Dr. Hewson from the University of North-eastern Dakota in the U.S. claims that 'The pacific garbage patch is a huge environmental problem, so big that it is becoming visible from space'.

However, there is some controversy. Other scientists suggest that this is nonsense, and an accurate description of the problem is required. According to Dr. Edwards from the American Academy of Environmental Studies, plastic breaks down into smaller pieces called microplastic, and that is more worrying as fish and other marine life will ingest it. In addition, Drs. Lynott & Turner from the Irish Environmental Academic Council suggest that as the population expands and more rubbish is dumped into our oceans, this problem is going to get bigger and microplastic will begin to enter the human food chain. This could potentially be catastrophic for peoples' health.

As I mentioned earlier, the term soup has often been floated to describe microplastic pollution. This dense cloud in the water blocks light penetrating to the deeper levels of the ocean which in turn prevents plankton and algae growth. Plankton is a major source of food for small marine life and it is on these that larger fish such as tuna depend. So, the potential for damage to the entire marine food web is high. Another problem is that plastic both absorbs and leaks pollutants. As it breaks down plastic releases colorants and chemicals into the water, for example BPA which has known health side effects. Plastic also absorbs PCB which can enter the food chain when the plastic is eaten by marine life.

The situation is further compounded by the question of who is responsible for the rubbish patch. No one country is willing to take on that responsibility. Therefore, it is left to environmental organisations to investigate and address this. By all accounts it cannot be cleaned up as it is almost 70 years of rubbish, and microplastic is tiny and it is dispersed over a large remote area.

In conclusion, the solution to this problem seems to be less reactive and more proactive. Dr. Cash, head of the Australian Association of Environmental Scientists suggests a united approach to minimising plastic waste stating; 'To date only 8% of plastic is recycled, and with plastic production expected to triple in the coming decades, recycling must be a top priority for governments, environmentalists and each and every one of us.' If we want to reduce this environmental tragedy, we must first start by changing our own lifestyle.

Thank you for your attention, I am grateful to be able to speak about this serious issue in front of such distinguished guests.

Track 7

News reporter: ... and in other news, Dubai Municipality has introduced new regulations regarding noise pollution in response to complaints received from residents across the emirate. Many residents living in neighbourhoods close to airports have long complained about the noise levels of low-flying planes coming in to land or taking off, suffering from many nights' disrupted sleep due to the noise pollution caused. Residents in other areas have complained of noisy construction work often starting early in the morning and taking place over the weekends. While other complaints were received from residents in busy areas with a lot of traffic and thoroughfare late at night, causing disrupted sleep due to the high level of noise and bright lights.

The Municipality decided to take action due to the volume of complaints received and concerns over residents' health. Research has shown that light and noise pollution can cause stress, anxiety and depression amongst other ailments, in addition to the dangers of sleep deprivation on safety, particularly for road users and those working in jobs requiring high concentration levels.

Which brings us on to our next news item regarding the upcoming Earth Hour. There will be participation across the UAE in this global environmental movement, which occurs this Friday, so be prepared for the emirates to go dark. For those who haven't heard of Earth Hour before, it takes place every year when people around the world show their support for environmental protection by switching off. Switching off their lights, TVs, computers - anything that consumes power, for an hour. This year's Earth Hour begins at 7.30 this Friday night until 8.30.

Track 8

Mona: Did you hear the news today?

Asma: No, what happened?

Mona: The government has set some new regulations about light and noise pollution, so hopefully, I'll finally be able to have a good night's sleep!

Asma: Oh that's good! Yeah, the construction work going on near my house really bothers me, especially at the weekend.

Mona: Yeah, exactly. They also said that light and noise pollution is really bad for our health.

Asma: Oh really? That's bad; my sleep is often disturbed.

Mona: Yes, it's quite concerning actually. They explained that light and noise pollution can cause stress, anxiety, and ... oh I can't remember the word, it's like when you feel really down and sad..?

Asma: Ohhh, depression?

Mona: Yes! That's it.

Asma: Oh gosh, that's terrible, I didn't know that.

Mona: I know, I mean it's always been annoying, but yeah I had no idea it had that much of an effect.

Asma: True.

Mona: Anyway, they also talked about something else that interested me, it's something to do with the environment when everyone switches off their lights. Have you heard of it?

Asma: Yeahhh, I know what you're talking about. Earth Hour, right?

Mona: Yes! That's it! Are you going to do it?

Asma: No, I don't think so. What's the point? You switch your lights off for an hour... How does that really help the environment?

Mona: I know what you mean, but it's more than that. I thought that too but I've been reading about it online.

Asma: OK, what did you find out?

Mona: Well, yes, they do the Earth Hour every year, but that's more to get people's attention.

Asma: Oh I see, it's a kind of advert...?

Mona: Yes! It's similar to a marketing campaign.

Asma: Oh, okay.

Mona: Yes, and really they're sending a message to people to switch off more often, not just for Earth Hour, and highlighting that we need to think about the environment. And, not just that but how it affects us and our health now, not only in the future.

Asma: Ah like what they were saying about light and noise pollution?

Mona: Exactly!

Asma: Oh, OK. I think I might do it then.

Mona: Oh good! They're on social media as well, so rather than .. oh what's the word?

Asma: I don't know. What word?

Mona: It's a thing that you give to charity.

Asma: Oh, a donation?

Mona: Yes, right. So rather than donating money, you can donate your social media page or feed to help spread the word.

Asma: Ah, I like that idea. OK, let's do it.

UNIT 11

Track 10

Interviewer: Hi, welcome. Please have a seat.

Salem: Thank you.

Interviewer: So, Salem, let's begin by getting to know you a bit more. Tell me, how would you describe yourself?

Salem: Well, I would describe myself as someone who is ambitious, hardworking and motivated. I've applied these qualities throughout my school career, which has helped me to progress well in my studies, and it's my intention to continue this throughout my university studies.

Interviewer: Great. I can see here that you've applied to study Civil Engineering with us.

Salem: Yes, that's right.

Interviewer: Could you tell me why you chose this subject?

Salem: I've always been fascinated by how things work and how they are put together. I enjoy studying Maths and Physics, and luckily, I'm also good at them, so I've been interested in studying Engineering for a long time.

Interviewer: What do you think you might struggle with?

Salem: Of course, I don't expect university to be easy. And, while I'm confident that I have the skills to complete the course, I think I could struggle with making new friends because I can be a bit reserved at times.

Interviewer: Oh, well, not everybody can be outgoing.

Salem: Mm true.

Interviewer: So, Salem, I can see from your application that your home is quite far away from this university. Why did you choose this university?

Salem: Well, there are a number of reasons. Firstly, I've researched this university and it's one of the top performing universities for Civil Engineering in the region. Also, while I can be reserved, I'm rather independent, so I'm looking forward to living away from home and managing on my own.

Interviewer: Ok, that makes sense. As you said, this is a high ranking university for Engineering, which means we expect a lot from our students. Will you apply yourself to the course fully?

Salem: Oh completely. As I said before, I'm very hardworking and motivated. Also, I'm highly interested in the subject I want to study, and the career I hope it will lead to.

Interviewer: And, how do you handle pressure?

Salem: I cope with pressure very well, in fact, I think it makes me more productive. If I know there is a deadline for a piece of work, it focuses me to complete it and to complete it well.

Interviewer: Very good. I know we've talked generally about Engineering as a career, but what do you see yourself doing when you complete your degree?

Salem: I see myself specialising in construction and possibly completing a postgraduate certificate.

Interviewer: Interesting. OK and final question, Salem. Why should we offer you a place?

Salem: Ermm. I think you should offer me a place because I'm interested in and enthusiastic about the subject I wish to study. Not only do I enjoy the subject, but I'm also good at it, as shown by my school results. I can handle pressure and tight deadlines. And, my ambition is to have a career in Civil Engineering, so I'm motivated and I'll work hard.

Interviewer: Thank you Salem. It was a pleasure to meet you. We'll let you know our decision by the end of the week.

Salem: Thank you.

Track 11

Interviewer: Interesting. OK and final question, Salem. Why should we offer you a place?

Track 12

M: How was your university entrance interview today?

D: I don't think that it went very well, I don't think that I will be admitted to the school.

M: Why? What happened?

D: They didn't look very impressed when I left. In fact, they all had frowns on their faces. I must have given them a poor initial impression.

M: Why do you think that? Did you smile when you walked in the door?

D: Of course! Though it may have been more of a silly grin rather than a normal smile.

M: Hmmm... Okay, well, did you remember to keep your hands out of your pockets?

D: Well... I started to feel nervous, and I might have forgotten to take them out... I must have looked so uncomfortable!

M: I am sure you are just being too critical of yourself, I am sure that you did very well.

D: No, I just know that I won't be able to go to my dream university! What will I do?

M: Well, just before you came home, I received a call from the university admissions office... They thought you were brilliant! Congratulations, they accepted you!

Track 13

Khodija: Hello Professor Asma, I am so sorry that we were late. Our English lecture ran a little longer than we thought it would. We are both really anxious about our behavioral psychology exam next Wednesday and are grateful that you could make some time for us.

Professor: Hello Khodija, Hello Huola, it's good to see you. That is no problem at all, I am always happy to help my students. Please come in and take a seat, I will be only a moment.

(brief pause)

Professor: Alright, so what questions do you have for me?

Huola: well, we have quite a few, actually. We are really worried about Chapter 17, you know, the one on body language and how it can affect the way someone views you. I think the first question we have is about facial expressions.

Professor: Of course, That can be a tricky subject. Well, what do you remember about the different facial expressions?

Khodija: I think I mig... Wait! Okay, if I remember correctly, one theory on facial expressions claims that there were six main emotions conveyed by facial expressions- surprise, sadness, disgust, happiness, fear and anger. And to get facial expressions, emotional stimuli tells your facial muscles to communicate an emotion.

Track 14

Professor: Great! That is one of the main theories we discussed this term. And how about practical examples. For example, if you were going into an interview, what type of expressions should you avoid?

Khodija: Umm... Well, I know that you definitely want to smile and look positive and confident.

Professor: Okay, but what type of smiles should you avoid?

Khodija: Well, I know that smirking at any questions that they ask is not a good thing at all. It might convey smugness or arrogance, right?

Professor: Exactly. An interviewer, or even a new acquaintance, might be put off by that. What else?

Huola: Well, a tight-lipped smile is also not a pleasant expression. It can tell the person a lot. If I remember correctly, one of the things that it shows is that you are doing something that you don't want to do. Like when your parents want to take a photograph of you on holiday and you are not in the mood! I always remember that one because I can easily relate to it. My parents ALWAYS want me to take pictures on holiday when I have just woken up early in the morning! So, basically it is a dishonest smile, used to try and be polite. But It can also come from stress or uneasiness.

T: Very good. It is also the most common smile that people used when greeting someone they don't know very well on the street.

Khodija: Okay, well, I feel quite a bit better about that. I feel pretty good about expressions like scowling and frowning. They are the easiest questions on the exam. They just mean that you are upset or frustrated with someone or something.

T: Excellent!

Huola: Okay. Well how about body language? I just know that there will be questions about hand gestures on the test.

T: Well, I can't tell you anything TOO specific, but how about we review what you know. That should give you a good review.

Khodija: That sounds like a good idea. I know that hand gestures are really important when doing public speaking. They can really help to get your point across. For example, if you want to show that you are sincere, you should hold your hand up to your heart. I guess that would say that I am speaking from my heart.

T: That is correct. Though remember it doesn't necessarily mean that you actually ARE being honest. It just means that you want your audience to THINK that you are being honest.

Huola: Haha, that is a really good point. If I remember correctly, you can pound the podium or desk with your fist when you really want to emphasise a point.

T: Great! And what do you want to avoid if you want to convey confidence?

Huola: Well, you definitely want to avoid putting your hands in your pocket. That shows that you are nervous. You also want to be sure to look your audience in the eyes. By doing that, it shows that you really know what you are talking about. It is not good if you lower your eyes, or have your head down. DEFINETLY do not just read off a script.

T: It really sounds like you girls have been studying this section hard. I am quite impressed! You should be able to do very well. Now how about any other questions?

Khodija: Well, we were wondering if we could also talk about Chapter 18, the one covering body language from around the world...?

Track 15

Boss: So tell me about the next candidate. Farhad, was it?

Man: Yes, Farhad. I was very impressed with this young man.

Woman: I agree. He had a great personality. He really stood out!

Boss: Oh, what do you mean?

Woman: Well, what I noticed first was his confidence.

Boss: How did you notice that?

Woman: When he walked in, he looked us both in the eyes and had a confident smile on his face.

Boss: Hm.

Man: He also shook my hand before sitting down.

Woman: Many of the other younger candidates didn't shake hands.

Boss: So he had some confidence. That's a good start. What else?

Man: He was very approachable.

Boss: Approachable? How so?

Man: Farhad wasn't too serious, but also not too relaxed. He had a way of putting us at ease and made us feel comfortable.

Woman: And we were the ones interviewing him! (laugh)

Boss: Interesting.

Woman: He really gave the impression that he would work well in our team. Very approachable and friendly. Does that make sense?

Boss: Yes, yes, I understand. So he's confident and approachable. That definitely puts him ahead of some of the other candidates. What else did you notice?

Woman: He was receptive.

Boss: Receptive? What does that mean?

Woman: You know, someone who listens to what we had to say and let us finish before speaking.

Man: I noticed that as well. I felt like he was really listening and not just waiting for his turn to talk... Do you follow me?

Boss: Sure.

Man: Also, he asked very good questions about the position and the company.

Woman: That shows that he was very proactive. He was actively listening and wasn't afraid to ask for a clarification if he didn't understand.

Boss: I see. Confident. Approachable. Receptive. Seems like a real people person.

Man: Exactly! An extrovert like him would do well on our team.

Boss: Well, I've decided. Call him up and invite him in for the next round of interviews. Okay, onto the next application...

UNIT 12

Track 16

Asma: Hi Noora

Noora: Hi Asma. Nice to see you at last!

Asma: I know; life is really busy at the moment.

Noora: Likewise, my workload is through the roof at the moment. I have so much marking to do; I can't wait for the summer to come!

Asma: Ah I'm so jealous of your summer break! I wish my holidays were as long as yours.

Noora: Yes, the holidays are a real perk, but we do have to earn it Asma. I'm in work from 7am and some days I'm still marking or planning for the next day up until 10 at night, and when we have inspections it's even worse!

Asma: I know; I know you work hard. And your work is so much more energetic than mine. I don't know how you have the energy actually. One thing I like about my job is that I mostly work on my own and I don't really have to interact with that many people. Well, there's the co-pilot of course and the rest of the team, and air traffic control, but it's nowhere near as many as you. And you have to be so energetic to keep the kids interested, I couldn't do that.

Noora: That's true, but I don't know how you work the hours you do, and weekends! I mean, I work weekends, but that's marking or planning at home, whereas you spend whole weekends away from home.

Asma: I know, the shifts can be tough, particularly on my home and social life, but it's ok, I like that my routine changes, at least I don't get bored!

Noora: Haha yes I guess.

Asma: Although, it does make it difficult to plan things.

Noora: Yes! I think it took us about two weeks just to plan this coffee!

Asma: Haha true. Oh here's Hanan.

Hanan: Hi ladies!

Asma: What have you got there Hanan?

Hanan: Oh, these? They're the plans for the current project I'm working on. It's taking over my life at the moment!

Noora: Oh you poor thing! Things must be crazy for you when you have a big project on, it's nice of you to find time to catch up with us.

Hanan: It's the only way I can stay sane! [Ladies laugh] But yes, it is usually a bit quieter than it is at the moment. However, when a project is nearing a deadline, it's far more difficult to see friends and make time for myself. Similarly, if the client changes their mind about something or we find out that there's a planning restriction on what we want to build, it can mean that we have to change things very quickly and work longer hours to get the project finished by the deadline. So, yes, it can be stressful, but on the other hand it's also very rewarding; when you see the building finished and the happiness on the clients' faces, it makes it all worthwhile.

Noora: That's so true Hanan. While my job can be stressful at times, this is my vocation and I love what I do. This is definitely the best job for me.

Asma: Me too!

Track 17

Ali: Hello listeners, welcome to your bumper-to-bumper prime-time drive show! We have a great programme lined up for you today. We have three guests who want to tell you about their unusual jobs.

First, we have Salem. Salem, welcome to the show! Could you please tell our audience what you do for a living?

Salem: Well first, Ali, I would like to thank you for having me on your show. As for my job, I am a flavourist.

Ali: A flavourist? What is that?

Salem: Well, I work with different chemicals and natural flavours to try to improve the food we eat. For example, if you have ever eaten a strawberry lollypop, there is a good chance that most of what you were eating were chemicals that make the delectable "strawberry" flavour.

Ali: Fascinating! Tell our listeners how you found your start in this career?

Salem: Sure. Even before I started studying at university, I was always fascinated with taste and flavour. I would often prepare meals for my family at age six. I loved trying out different spices and seeing how they would interact.

Ali: What did you have to study at university to prepare you to become a flavourist?

Salem: I studied chemistry as an undergraduate. I also received a Master's Degree in Chemical Engineering. While it is a very rewarding job, it also requires a lot of late nights doing research! But we need the knowledge to avoid mixing chemicals that are toxic when combined.

Ali: Wow, that is something that hadn't thought about. Before we move on, can you tell me one interesting flavour that you work on.

Salem: One of my favourites is chocolate. Raw cocoa beans that chocolate is derived from are actually very bitter. We combine chemicals that individually smell like cooked cabbage, dirt, peaches, etc. to create that famous chocolate flavour. However, we have to be discreet when it comes to our recipes, we don't want our competitors to know our secrets.

Ali: Thanks Salem, that was some great insight into one of the more unusual jobs! Next, if you live and breathe colour, we might have a job for you! I am pleased to welcome Houla onto our programme.

Houra: Thanks Ali, and yes, I DO love colour! I love colour so much that I have become a colour expert.

Ali: A colour expert? SO does that mean you create new colours?

Houra: Haha, not quite, Ali. What I do is assist people in selecting colours for their homes or offices.

Sometimes I am even consulted to help find colour schemes for an entire hotel!

Ali: Wow, that is impressive! So how did you become a colour expert?

Houra: I have always have an affinity for colour. When I was six years old, my family moved into a new villa. I remember walking around with my parents telling them what colour each room should be.

Ali: And did your parents listen to you?

Houra: Believe it or not, they did listen to some of my advice. And years later, they still say that I chose the best colours in the entire house! From then on, I studied interior design, which lead me to where I am today.

Ali: Incredible. So, if I hired you, you would come and pick out the colours for every room in my house?

Houra: Hmm...well, it is not quite that simple. I don't simply choose colours, I work with my clients to help them find what is best for them. Otherwise I would have the same colours in each of my clients houses.

Ali: that is a very true. So how do you know what colour should go where?

Houra: it requires a significant amount of research. I must take into consideration regional preferences, my clients personalities and what colours are popular at the moment. I would hate to consult a client only to find out a year later that their house colour is clashing with all of their neighbors' houses.

Ali: Certainly, I see where a poorly coloured could be a glaring mistake on a CV! So, last question. What is your favourite colour right now?

Houra: That is easy! Right now I LOVE turquoise. It really makes everything seem tranquil, and not shocking or jarring like neon green!

Ali: Haha! Thank you Houla! That is a LOT of information. Now to our last guest. Rashed. Good morning Rashed, and welcome to the programme. Rashed works as a voiceover actor.

Rashed: Thank you Ali, it is a pleasure to be on the show.

Ali: So Rashed, what can you tell us what it is like to be a voiceover actor.

Rashed: well, many people think that all you need to be a voice actor is to have a computer with a microphone, and of course a soothing, audible voice. But it is not that easy. I took years of voice acting classes before I was hired for my first job, no one wants to hire a voiceover actor with a boring, bland voice.

Ali: What type of voiceover work do you do?

Rashed: Mainly advertisements and some documentaries. I just finished reading for a documentary about the history of the unification of the UAE. So one additional advantage to the job is that I learn a lot!

Ali: So with all the different advertisements, documentaries and other jobs that need voiceover actors, there must be a lot of work.

Rashed: Actually, it is a really competitive industry. Most voiceover actors only do it part-time. In fact, a

small group of people do the majority of the work. So, unless you are very dedicated to it and willing to work for a long time without earning a lot of money, it might not be the career for you.

Ali: Huh. That is really interesting. Now I am glad that I already have a job in radio! Unfortunately, that is all the time we have for today. I would like to give our guests a huge thank you for their time.

Track 18

Interviewer: I would like you to describe a school subject that interest you.

Speaker: Well, I would say right now my favourite subject to study is science, especially biology and chemistry. However, that was not always the case.

Track 19

Interviewer: I would like you to describe a school subject that interest you.

Speaker: Well, I would say right now my favourite subject to study is science, especially biology and chemistry. However, that was not always the case.

When I was younger, I really enjoyed art. I loved when my teacher gave us students a piece of paper and some paint, and I would start drawing all the beautiful pictures that I saw when I was day dreaming. I really liked to draw villages and markets filled with people, animals, and food.

When I started 6th grade, I took my first biology class. I remember that at first I saw all the diagrams of cells and different animals and thought that it looked very difficult. I was worried that I would never remember all the parts of a cell, or the process of osmosis! But slowly over that first year, everything started to become clear. What fascinated me most, and still makes me so interested in it, is understanding how the living world worked. On exams, not only did I recognize the important vocabulary, but I could also label diagrams of complicated biological processes. It was not difficult, it was fascinating! By 8th grade, it was my favourite subject by far, and has continued to be.

Now, when I think about my future, all I want to do is work in science. I could easily see myself spending all day in a laboratory, making new discoveries and getting papers published in famous journals. Or maybe even become a Nobel Prize winner! But what I really want to do right now is use my passion to help other people and to help my country. In my opinion the best way to do that is to become a doctor. So, when I go to university, I want to study medicine.

Interviewer: Thank you.

Track 20

Interviewer: I am going to ask you some questions related to school and careers. First, do you think it is important for students to decide their future at a young age?

Reem: No, I don't. When I look back at what I wanted to be when I was in 2nd grade, in 6th grade and in 10th grade, everything was different. When I was in 2nd Grade, I wanted to be an astronaut, in 6th grade an artist and finally in 10th grade I knew that I wanted to become a scientist. If I would have decided by 6th grade that I wanted to be an artist, I would have never discovered my passion for science. We all learn new things, and our interests change.

Interviewer: In today's world, what school subjects are important for students to study?

Reem: Well, if I have to be honest, I would say that every subject we learn in school is very important for our education. Each one helps us grow through knowledge. If I had to choose some subjects that are specific to our modern world, I would say that because technology is becoming more and more important in our, I think that it is very important that students take classes in science and mathematics. These are the building blocks of the future. In addition, English is very important too. In the UAE, English is one of the main languages of communication, so we must speak good English to communicate with all the different people who live here. Moreover, if we want to work or study internationally, we must know English because it is such a global language.

Interviewer: What type of careers does studying English prepare students for?

Reem: Well, as I said earlier, it is a very global language. I think that no matter what career you choose to pursue, studying English will have a big benefit. For example, if I want to work in business, then it is important that I can write to different firms around the world and communicate ideas to them, as well as understand their ideas. Or, like myself, I want to work in science, so it will help me to write for English language scientific journals and communicate with other scientists.

Interviewer: For what careers do you need to go to university?

Reem: Well, some careers, like being a doctor, require that you study at a university to learn a foundation in science, and then you have to go to a medical university where you study specific things you need to know to be a doctor. Many careers require extra education, but not necessarily at a university. For example, if you want to become a police officer, you do not need to attend university, but you do need to attend a police academy. Other jobs, like going into business, also do not require university. But it certainly can help.

Interviewer: What reasons are important in choosing a career?

Reem: Hmm... I guess one of the first things that comes to mind is money. You want to be sure that you can earn a good living and do the things you want to do. But for me, having a real passion for what I am doing is the most important thing. It would be hard for me to work in a career that I don't love. I want to go to work every day feeling like I am going on holiday!

Track 21

Speaker: A cure for cancer? [short pause] A colony on the Moon? [short pause] Our lives have limitless opportunity! Hello everyone, my name is Hassan Al Khaja, and today I want to talk to all of you about my dreams and aspirations. I will be graduating from school very soon, and I have thought quite a bit about my future. And not just my immediate future, but what my aspirations are over the next several years.

Now, I realize that curing cancer or helping to create a colony on the Moon may seem like very lofty goals. But what fun is life without high aspirations? So today I will talk about my immediate plans over the next year, including attending university. Then, I will talk about my long-term goals, like what I want to study at university and my goals and aspirations as well as how my studies will shape my future. So, even if being the first person to set foot on Mars seems ambitious, I am still planning on pushing myself as far as I can to accomplish my dreams.

Track 22

Speaker: To start, I will talk about my short-term goals. My first goal is to be accepted into a great university. I know that it will be a really difficult process, but I feel like I am up to the challenge! Right now, I am preparing by studying for the IELTS exam. I am reading a lot of great classic books with complicated words so that I can improve my reading and vocabulary skills. I am also listening to podcasts in English about topics that I really enjoy. For example, right now I am listening to a fascinating podcast about the Emirates Mars Mission. Not only do the podcasts improve my listening skills, but I am learning so much interesting information about our space programme. So, after all that hard work, hopefully by this time next year, I am hoping to be studying at Khalifa University. This is important for the next stage of my goals.

So, now for my long-term plans. After entering Khalifa University, I am planning to study Aerospace Engineering. Ever since reading about the American Apollo 11 Space Mission to the Moon when I was younger, I dreamed of becoming the first person on Mars. So, when at university, I will have to study physics. It is a difficult subject for me, but it is something that I know that I can master if I put in the effort! Likewise, I will need to have a good understanding of astronomy. I can't really expect to become an astronaut if I don't know anything about space.

Conversely, while I am determined to work in Aerospace Engineering, my best friend, Ahmed, has no idea what he wants to do. One week he is thinking about becoming a doctor, the next week an English teacher. So, who knows? Maybe I will wake up tomorrow and want to start looking to becoming the next great Emirati poet! But back to my goals. Finally, after finishing university, I am hoping to get a job with the UAE Space Agency and work at the Mohammed Bin Rashid Space Centre

in Al Khawaneej. Working for the Space Program, I know that I can be on the cutting-edge of technology. I hope to be a major contributor to the Mission to Mars, and maybe even become one of the astronauts to go!

Track 23

Speaker: So, in conclusion, I have a lot of goals and aspirations for my life. Right now, I need to work hard to get into a great university. Next, I can study Aerospace Engineering so that I finally I can realize my dreams and work for the UAE Space Programme. However, if I don't attempt to fulfil my dreams, then I will never be happy knowing that I never tried.

2. One week he is thinking about becoming a doctor, the next week an English teacher.
3. Finally, after finishing university, I am hoping to get a job with the UAE Space Agency and work at the Mohammed Bin Rashid Space Centre in Al Khawaneej.

Track 25

Presenter: Good afternoon ladies and gentlemen. I know that most of you will probably be graduating this year. Congratulations! Graduation is a time to celebrate. After all that hard work and sacrifice, you certainly deserve it. You will hopefully now be ready to embark on the next stage of your life – landing that perfect job. But be warned. This definitely won't be easy. Fear of unemployment and the pressure of finding a job you love will obviously take their toll...unless you prepare yourselves. Don't panic, that's why I am here – to offer you some advice to help you start your professional journey.

I'm sure we all agree that having the technical expertise and experience is great but remember you will undoubtedly be applying for jobs at entry level. So, having the ability to work as part of a team and being a good communicator will certainly be extremely important in persuading future employers to give you the position. Become more self-aware and get feedback from your peers and teachers on how others see you. Also, put yourself in positions where you are communicating face-to-face and not just online.

Don't underestimate the power of technology to make yourself more employable. Potential employers will quite probably use the internet to recruit and research candidates. A strong personalised presence relevant to the position you are looking for will undeniably help you access a wider audience.

Take control of the direction you wish to take. The perfect job certainly won't come to you. You need to be proactive. Go out and search for employers and contact

people who already do the job you want. Ask them what it's really like and what they suggest you could do to get on the first rung of the ladder. Most people will invariably be happy to help you...
