## The Elements of the Electronic Damaging Act in the Jordanian Law

*Nael Ali Al-Masa'adeh\**

### ABSTRACT

Due to article 256 of the Jordanian civil law, damaging act or delictual responsibility is based on three elements: the damaging act, the damage, and the cause link; in other words the damage should come as a result of the damaging act.

This responsibility becomes electronic if the damage is electronic; this is to say that the damage element is the one which makes it electronic, and gives it that description.

Electronic delictual responsibility is different from the ordinary one in the nature of damage, in the ability of the computer user to avoid its effects mostly by following some directions, and in the huge value of damages.
